 COST EFFECTIVE SOLUTION FOR WALLS/CEILINGS  
 MULTI-FAMILY, SINGLE FAMILY, HOME THEATER

STC  
63

Model A237R

## Unique patented thermoplastic rubber with sound cell design

Sound Isolation Company and Studco Building Systems have released a new range of patented sound isolation products for your walls and ceilings.

Acoustic control for airborne sound has become a major issue for architects and interior designers for high density apartment living, condos, townhouses, studios & theaters.

Resilmount soundproofing clips are compatible with standard drywall furring channel available locally. The common practice of using metal channel to improve wall and ceiling STC is dramatically improved with Resilmount by at least 7 STC points. Resilmount clips are the most cost effective noise control system because they isolate the structure from the interior partition.

Install on metal using #10 x 1 5/8" self-tapping screw

Use with 7/8" or 1 1/2" furring channel

## US Distributor of all Resilmount Products

- ▶ Dead load 55 lbs each clip (max)
- ▶ Spacing of clip is 48" o.c. (max)
- ▶ Simple installation with screws or masonry anchors to any substrate.
- ▶ Use with 7/8" or 1 1/2" furring channel

## Nationwide Distribution of Resilmount Clips
